1           **Title: "DISPOSITION APPLIED TO COOKING POTS AND SIMILAR"**

2                               **DISCLOSURE OF THE MODEL**

3           The present model refers to a just developed pot for cooking food, featuring  
4 an internal dividing wall and lid divided into two halves, fastened to pot by means of  
5 special hinges on its outer rim, allowing the two halves to be opened side ways.

6           The purpose of the present model is to permit two different kinds of food to be  
7 cooked at the same time in the same pot, without getting their seasonings mixed and  
8 reducing fuel consumption, since only burner on the range will be used to effect the  
9 food cooking.

10          Making the daily routine of those who live alone easier, by minimizing the  
11 consumption of fuel or all the chores involved in the preparation of it and even the  
12 number of kitchen utensil to be cleaned afterwards, since the time factor is also  
13 relevant.
